**FOR STRENGTH, LOW MAINTENANCE, RELIABILITY &
PERFORMANCE**

The Trench It tractor mounted trencher and 6-way blade setup combined with the Daedong CK35 tractor is the perfect piece of trenching machinery for the farmer and contractor.

The hydrostatic four-wheel drive CK35 Daedong provides for an infinitely variable gear speed for efficient trenching. The digging chain is driven by four SPB-section V-belts off the power take-off which has two speed settings. This together with the variation in engine revolutions gives a wide range of digging head-shaft speeds to suit all ground conditions.

DIMENSIONS

Length	4.65 metres
Width	1.54 metres
Height	2.33 metres
Clearance	1.9 metres

TRENCHING SYSTEM
